

Ishwar [Last Name] Hyderabad, Telangana | +91-XXXXXX-XXXXXX | ishwar@email.com LinkedIn: linkedin.com/in/ishwar-ai | GitHub: github.com/ishwar-dev

PROFESSIONAL SUMMARY Driven Artificial Intelligence & Data Science engineering student with a 9.0 CGPA and a strong focus on local-first, privacy-preserving AI systems. Proven ability to build, deploy, and manage full-stack AI applications, including offline RAG agents and Telegram-based LLM integrations. Certified in AWS and Oracle Cloud infrastructure.

EDUCATION Velagapudi Ramakrishna Siddhartha Engineering College (VRSEC) Bachelor of Technology (B.Tech) in Artificial Intelligence and Data Science Expected Graduation: May 2028 | Current CGPA: 9.0/10.0

TECHNICAL SKILLS

- **Languages:** Python, SQL, C++
- **AI & Machine Learning:** LangChain, ChromaDB, RAG Architecture, Model Quantization, Local LLMs (Ollama, Phi-3, Llama 3), CNNs
- **Frameworks & Libraries:** python-telegram-bot, sqlite3, pypdf, requests, dotenv
- **Cloud & Infrastructure:** AWS (Cloud Foundations Certified), Oracle Cloud (Certified)
- **Hardware Systems:** Raspberry Pi 5, Edge AI integration

ENGINEERING PROJECTS

AutoIntern | AI-Powered ATS Analyzer *(May 2026 - Present)*

- Developed a fully functional Telegram bot that ingests candidate resumes (PDFs) and provides real-time Applicant Tracking System (ATS) scoring.
- Engineered a secure, 100% offline backend pipeline routing extracted document text to a locally hosted Microsoft Phi-3 LLM via Ollama API.
- Implemented SQLite database tracking to manage user tiers, limiting free executions and triggering a premium upgrade pathway.
- Secured environment variables and API tokens using strict dotenv configuration and Git version control management.

SovereignAI | Offline RAG Agent *(March 2026)*

- Built and deployed a 100% local Retrieval-Augmented Generation (RAG) agent to process private documentation without internet dependency.
- Integrated LangChain and ChromaDB for high-speed vector retrieval and context injection.
- Conducted performance benchmarking on model quantization to optimize inference speeds on consumer hardware.

Project Ayur-Lens | Edge-AI Microscopic Authenticator *(Spring 2026)*

- Designed a hardware-software prototype using a Raspberry Pi 5 and Camera Module 3.
- Trained and deployed Convolutional Neural Networks (CNNs) directly on edge hardware for real-time microscopic image authentication and supply chain ledger tracking.

CERTIFICATIONS

- AWS Certified Cloud Practitioner Foundations
- Oracle Cloud Infrastructure Certification
